Archi Children

Children aged 7-12 are invited to participate in an architecture workshop dealing with architecture and urban planning. Members of the Association of Polish Architects (SARP) and the Silesian Chamber of Architects organizing the workshop guarantee a truly professional approach to its subject. A theoretical introduction and practical part of the workshop are aimed at teaching children how to think about architecture, what is its significance on different level, what do the professions of an architect and urban planner involve, and how can we, as conscious city dwellers, have an actual influence on the shape of the city we live in.

EmpaTiKi – workshops on creative sewing of toys and everyday objects

Children will get to choose colours, textures, materials and buttons. They will show their courage while threading a needle and present their creativity while sewing a smile onto a toy's face. Together we will first design colourful, imaginative and mysterious patterns, drawing inspiration from the world of animals, aliens and other creatures inhabiting the land of children's imagination. We will create useful items: key rings, two-sided door hangers or unique bookmarks. Children will determine the function of their handicrafts.

The second part of the workshop will be devoted to the subject of a soft felt toy. We are sure everyone would like to present their work... The awareness that there is not a single toy similar to the one they have created is very uplifting for children. Two-sided toys by EmpaTiKi have two faces illustrating the emotional state of the author, like anger or curiosity. It is the author who shapes their character. A pocket for a message or letter for a loved person may be sewn onto the belly of the toy. The toy might have the form of a door hanger with replaceable notes informing about the emotional state of the occupant, e.g. "I'm sad. Bring chocolate!"

Workshop on the creation of dream catchers

Every child deserves to feel comfortable. Especially in their own room. We might add a bit of magic to a child's room with a dream catcher filtering out nightmares, leaving nothing but beautiful dreams. During the workshop participants will learn how to make unique interior decorations using woven strings, ribbons, tapes and beads. To make them look beautiful in the bedroom, we will decorate them with quills. Falling asleep with a dream catcher above their head children will dream only beautiful, positive images.
